

Nevada Roots

Watch us grow

For the Olive and fruit tree control customers; watch for these!!

A brighter green nodule will appear and from that point we will have 30 – 45 days to get controls in place. Please email charley@nevadaroots.com or text to 702-461-6873 when this occurs.

Premature applications will have an effect but not the best.

Application after the olives are forming can be done also but it also has a reduced control and is more expensive.
